

Utility Rebate Guarantee Program

Utility rebate availability is limited... But not with CGE Energy.

State and local utilities have been very successful with their energy efficiency rebate incentives, but they have set careful limits within these programs. Each year these rebate programs run out of funding towards the end of summer. High demand for energy rebates has already pushed DTE Energy's program to 100%, and Consumers Energy is soon to follow.

The fall is also when business shift their focus to their exterior lighting. With daylight hours shortening, night time appearance, safety, and lighting energy efficiency become top priorities. CGE Energy can help you reduce energy use and improve your bottom line.

75% of the utility's rebate... Guaranteed.

Regardless of rebate availability, CGE Energy will match and guarantee 75% of your local utility's 2014 rebate value. What's more, CGE Energy's rebate will be taken off of your project proposal as a line item discount, so there's no waiting 6-8 weeks for the rebate to come back.

In exchange for our guarantee, customers assign their project's utility rebate to us for redemption if funds become available in 2015. Historically, rebates have decreased year-over-year.

However, if there are rebate funds over and above our guarantee, we pass those back to our customers.

Enjoy energy savings... Now.

Each week that an energy project is not installed at your facility could mean an additional \$1,000* in energy savings that you may have experienced! With CGE Energy's Utility Rebate Guarantee Program, there is no reason to wait.

We know rebates.

After performing hundreds of projects with DTE Energy, Consumers and other utilities, we know how to handle rebate applications. We are trusted and respected in the industry for our audit and rebate accuracy and are recognized as a DTE Trade Ally.

Some exclusions may apply to certain circumstances and projects. Contact CGE Energy to verify your facility's eligibility.

Each week that an energy project is not installed at your facility could mean an additional \$1,000* in energy savings that you may have experienced! With CGE Energy's Utility Rebate Guarantee Program, there is no reason to wait.

*\$1,000 in weekly energy savings is based on the average energy savings from a sample of ten auto dealerships.

Don't let a rebate put your project on hold. Start saving today!
